No. 477.

Office of the Mycologist & Entomologist,
Government of Mysore,
Bangalore, April 6th 1911.

From

Leslie C. Coleman, Esq., M.A., Ph.D.,
Mycologist & Entomologist to the Government of
His Highness the Maharaja of Mysore, Bangalore.

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Genl. and Rev. Departments, Bangalore.

Sir,

In connection with my work on Koleroga for the coming monsoon I have the honor to state the following :-

Applications have already been received for the spraying of 122 acres of areca garden as against 25 acres sprayed last year. I anticipate that this amount will be almost doubled by the time the spraying operations have to commence (i.e. in the latter part of May).

As I am anxiousto keep down the expenses of this work as much as possible, I propose to use the services of my permanent staff as far as possible for supervising the work. At the most, however I shall not be able to spare more than five or six men and these will be quite incapable of coping with the work. It will be necessary in addition to appoint fieldmen temporarily as was done last year.

I estimate that at least ten men will be required for a period of three months to supervise the actual operations. In addition to this four of them should be retained for six months

(one in each infested taluk to make observations as was done last year). These men should be paid as before Rs. 20/- per month but without any travelling allowance. If I find that their services of any of these men can be dispensed with before the end of the period stated I shall of course do so just as was done last year and they will be engaged on the understanding that should their services not be required for the full term they can be dismissed at any time.

These men will be required chiefly to supervise spraying work in gardens where it has not been previously done and where therefore, the garden owners, have not learned the method. In other cases ~~the~~ sprayers will be loaned to the garden owners for their own use.

In addition to the above I wish to lease again the garden in Sagar Taluk that was leased last year for further experimental work. ~~In addition to this~~ Beside I wish to get two other small isolated gardens in which ~~I wish~~ to make a determined effort to stamp the disease out entirely. I think it highly probable that if in a garden, or series of gardens in a range, the disease could be kept out for 3 or 4 years it would be gone for good and further remedial measures might be unnecessary. It would be of course much easier to accomplish this in a small isolated garden than in a larger one. This attempt will be I believe fraught with great importance and should be made. The cost of leasing these gardens would not exceed Rs. 500/- and the money would be met by the sale of the crops.

I have the honor, therefore to request you kindly to obtain the sanction of Government for the expenditure of the following sums out of the Supari Cess Fund.

Pay of 6 temporary field men for three months at Rs. 20/- per month.	Rs. 360
Pay of four temporary fieldmen for six months at Rs. 20/- per month.	Rs. 480
Rental of three gardens for experimental purposes	Rs. 500
Total	1340

This total is little more than the sum sanctioned last year, and the sum of 800 for ~~xxxxxxxxxx~~ temporary fieldmen is actually less than the sum previously sanctioned although the work has greatly increased. I may point out in this connection that the Madras Government last year spent a sum of over Rs. 13,000 on operations in connection with the palm disease in the Godavari Kishtna deltas, a disease, which I certainly do not consider more serious than Koleroga.

I have the honor to be,

Sir,

Your most obedient servant,

Leslie Coleman

Mycologist & Entomologist.
